Patent No. 7,024,562

Inventor(s): Flink et al.

Issue date: Apr 4, 2006

Title: A METHOD FOR CARRYING OUT SECURE DIGITAL SIGNATURE AND A SYSTEM THEREFOR

Request for certificate of correction

Sir:

After reviewing the front page of the above identified U.S. patent, it seems that there is an error in the Assignee's name, which should be **Optisec Ltd.** (rather than Optisec Technologies Ltd., as appearing on the front page).

It is requested that a Certificate of correction be issued correcting printing errors appearing in the above-identified U.S. patent.

As the error listed is not to the USPTO's mistake, please advise what is the fees required for covering the certificate fee. Our check in the same amount will be sent immediately after.

Issuance of the certificate of correction would neither expand nor contract the scope of the claims.

Enclosed:

- A copy of the Israeli registration certificate of Optisec Ltd.
- Executed Form PTO/SB/44 (9-07)

Date: 11/13/2008

By: OptiSec Ltd.

Sincerely,

Yona Flink

ABSTRACT

Method and system for carrying out secure signing of a person on a data packet sent from a sender to a recipient, the sender and the recipient connected to a data network via network connection means. A biometric sample of the person is sampled and converted to a digital form. A first digital seal produced from the combination of the digital data packet and the biometric sample, or from two or more digital seals derived from the digital data packet and the biometric sample. The digital data packet and the biometric sample and the digital seal are sent to the recipient. A second digital seal is produced from the combinations of received digital data packet and the received biometric sample. The first and the second seals are compared and if the first and the second seals are identical, the authentication of the digital signature is approved. Otherwise, the authentication of the digital signature is denied.
